Ask about this product

Manufacturer	Siemens
Catalog number	6ds1312-8bb
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.06 kgs
Supply Voltage	+5 V ± 0.25 V
Power Consumption	< 0.9 A
Dimensions	233.4 x 160 mm
Weight	1.00 kg
Product Type	Interface Module
Product Family	TELEPERM

Description

The Siemens 6DS1312-8BB is an interface module designed for seamless integration into industrial automation systems, facilitating efficient communication between control modules and enhancing system performance and reliability. This module is part of Siemens' TELEPERM M series, known for its robust design and compatibility with various industrial applications. Key features include a supply voltage of +5 V ± 0.25 V, a power consumption of less than 0.9 A, and dimensions of 233.4 x 160 mm. The module is housed in a sturdy casing, ensuring durability and reliable performance in industrial environments. Its compact design optimizes space, making it suitable for various applications without compromising functionality. The 6DS1312-8BB operates on a high-speed data transmission system, allowing for fast and accurate data transmission between the control system and the connected devices. This ensures real-time monitoring and control of the connected devices, enhancing overall system efficiency. Designed with user-friendliness in mind, the 6DS1312-8BB comes with comprehensive documentation and support services, ensuring easy setup and maintenance. Backed by Siemens' renowned quality standards, you can trust in the reliability and longevity of this interface module.
