Ask about this product

Manufacturer	Siemens
Catalog number	6es7212-1ca00-0xb0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.39 kgs
Current	1 A
Industrial System	s7-200
Relay Specifications	264 VAC
Product Type	Module
I/O Channels	8 DI
Signal Type	264
I/O Configuration	8
Signal Level	264 V

Description

The Siemens 6ES7212-1CA00-0XB0 is a compact CPU module from the SIMATIC S7-200 series, designed for industrial automation applications. This module features 8 digital inputs and 6 relay outputs, providing a versatile solution for controlling various processes. It operates with a supply voltage of 24 V DC and offers a compact design suitable for space-constrained environments. The CPU module is equipped with 1 Kbyte of working memory, ensuring efficient processing capabilities for small to medium-sized automation tasks. Its robust construction and reliable performance make it an ideal choice for applications requiring dependable control and monitoring functions.
