Ask about this product

Manufacturer	Siemens
Catalog number	6es5947-3ua21
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.10 kgs
Cable Specification	1 × 20
Product Type	Module
Product Family	SIMATIC S5
Application Area	Industrial Automation
Processor Type	CPU 947
Memory Capacity	128 Kbytes
Dimensions	210 mm x 260 mm x 30 mm
Weight	0.52 kg
Memory	128 KB
Interface	1 x 20 mA

Description

The Siemens 6ES5947-3UA21 is a CPU module designed for the SIMATIC S5-155U programmable logic controller (PLC) system. As part of the SIMATIC S5 series, this module performs critical processing tasks, enabling efficient and reliable control of automated systems. It is particularly beneficial in legacy systems that require consistent and dependable operation. The 6ES5947-3UA21 executes complex instructions and manages communication between different system components, ensuring seamless integration within the automation environment. This module is suitable for applications where robust processing capabilities are essential for maintaining operational integrity and minimizing downtime.
