Manufacturer	Siemens
Catalog number	6es5311-3ka11
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.45 kgs
Product Type	Interface Module
Product Family	SIMATIC S5-135/155
Application Area	Distributed configurations up to 1000 meters
Dimensions	30 mm x 200 mm x 250 mm
Weight	0.34 kg

Description

The Siemens 6ES5311-3KA11 is an Interface Module (IM311) designed for the SIMATIC S5 series, facilitating distributed configurations up to 1000 meters. It enables seamless connectivity between expansion units and a central controller, offering a compact solution for efficient system integration. This module is particularly suitable for applications requiring reliable communication over extended distances. Key features include its robust architecture, meeting high standards of industrial automation requirements, and its compatibility with the SIMATIC S5-135/155 product family. Despite being discontinued, the 6ES5311-3KA11 remains repairable, making it an excellent choice for extending the lifespan of existing systems. Opting for repair over replacement minimizes downtime and capital expenditure.
