Manufacturer	Siemens
Catalog number	6se7026-0td71
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	14.97 kgs
Current	59 A
Product Type	Drive
Power	30 kW
Cooling Capacity	30 kW
Signal Type	510650
Signal Level	510650 V

Description

The Siemens 6SE7026-0TD71 is a compact inverter unit from the SIMOVERT MASTERDRIVES Motion Control Performance 2 series, designed for demanding motion control applications in industrial environments. Operating within a DC voltage range of 510V to 650V, it delivers a nominal current of 59A, enabling a power rating of up to 30 kW. The unit features an IP20 protection rating, making it suitable for installation in controlled panel settings. As a base drive, the 6SE7026-0TD71 allows for the integration of additional modules or options to meet specific production line requirements. Siemens ensures the reliability and quality of this model, making it a dependable choice for continuous operation in automation processes.
