## Description

The Siemens 6ES7212-1AA01-0XB0 is a compact CPU module from the SIMATIC S7-200 series, designed for efficient industrial automation control. This CPU 212 Compact Unit offers a program capacity of 512 statements and a data memory of 512 data words, ensuring robust performance for various automation tasks. It features 8 digital inputs and 6 digital outputs with relay outputs, providing versatile connectivity options for diverse industrial applications. With dimensions of 160 x 80 x 62 mm and a weight of 0.32 kg, it is suitable for installations where space and weight considerations are critical. As of October 1, 2013, this model has been discontinued and is no longer supported by Siemens under the PM500:Discontinued Product phase. Despite its discontinued status, the 6ES7212-1AA01-0XB0 remains a reliable choice for existing systems requiring maintenance or replacement, offering a cost-effective solution to extend the life of your automation equipment.
