| **Signal Type** | 24 |

## Description

The Siemens 6ES5485-7LA11 is a digital input/output (I/O) module designed for the SIMATIC S5-115U programmable logic controller (PLC). This module features 24 digital inputs and 16 digital outputs, all operating at a 24 V DC signal level. It is capable of handling a current of 1.5 A and includes four inputs that can function as interrupt signals, enhancing its versatility in industrial automation applications. The module's dimensions are 320 mm in length, 190 mm in width, and 50 mm in height, with a weight of 0.9 kg. Despite being discontinued, the 6ES5485-7LA11 remains a reliable component for controlling machinery and processes, and repair services are available to extend its usability.
