Manufacturer	Siemens
Catalog number	6es7317-6tj10-0ab0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.36 kgs
Industrial System	s7-300
Product Type	Drive
Weight	0.72 kg
Dimensions	160 x 125 x 117 mm
Working Memory	512 kbyte
MPI/DP Interface	12 Mbit/s
Front Connector	1 x 40-pin
Micro Memory Card	Minimum 4 MB

Description

The Siemens 6ES7317-6TJ10-0AB0 is a central processing unit (CPU) designed for the SIMATIC S7-300 series, tailored for both PLC and technology applications. It boasts a 512 kbyte working memory, facilitating efficient processing for complex industrial tasks. The CPU is equipped with two interfaces: an MPI/DP interface supporting data transfer rates up to 12 Mbit/s, and a DP (Drive) interface for seamless integration with drive systems. Integrated I/O technology enhances its versatility, and it requires a front connector (1 x 40-pin) and a micro memory card with a minimum capacity of 4 MB for optimal functionality. This model has reached the end of its lifecycle as of October 1, 2014, but remains repairable, offering a cost-effective solution for extending the operational life of existing systems.
