Description

The Siemens 6ES5420-5AA11 is a digital input module from the SIMATIC S5 series, designed for industrial automation applications. This module features 32 non-isolated digital inputs operating at 24V DC, facilitating reliable data acquisition in automation systems. Its robust construction ensures durability and consistent performance in demanding environments. The 6ES5420-5AA11 is compatible with various Siemens PLCs, making it a versatile choice for system expansions or replacements. Its straightforward integration and dependable operation make it a valuable component for enhancing automation processes.
