Description

The Siemens 6ES5433-7LA11 is a digital input module from the SIMATIC S5 series, designed for industrial automation applications. This module features 32 floating digital inputs, each capable of handling 5 to 24 V DC signals, making it suitable for a wide range of input devices. It is specifically engineered for the S5-115U PLC system, ensuring seamless integration and reliable performance. The module is housed in a compact form factor, facilitating easy installation and maintenance within control panels. As a discontinued product, the 6ES5433-7LA11 remains a valuable component for maintaining and upgrading existing Siemens S5-115U systems, offering a cost-effective solution for extending the lifecycle of these automation setups.
