Ask about this product

Manufacturer	Siemens
Catalog number	6es5464-8mg11
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.27 kgs
Number of Input Channels	4 channels
Input Signal Range	4 to 20 mA
Module Type	Analog Input Module
Compatible PLC Series	S5-95F
Discontinued Status	Discontinued

Description

The Siemens 6ES5-464-8MG11 is an analog input module designed for the SIMATIC S5 series programmable logic controllers (PLCs). This module features four analog input channels, each capable of processing current signals ranging from 4 to 20 mA, making it ideal for applications requiring precise current measurements. The module is engineered for fail-safe analog value processing, ensuring reliable operation in critical industrial environments. It is compatible with the S5-95F series, providing seamless integration into existing systems. The 6ES5-464-8MG11 is a discontinued product, with its production officially concluded on October 1, 2022. Despite its discontinued status, the module remains a viable option for sustaining existing systems reliant on the 6ES5-464-8MG11, with repair services available to extend its usability.
