Manufacturer	Siemens
Catalog number	6es5460-7la11
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.38 kgs
Number of Analog Inputs	8 inputs
Dimensions	195 x 310 x 42 mm
Weight	0.86 kg
Successor Model	6ES5460-7LA13
Repair Services Available	Yes

Description

The Siemens 6ES5460-7LA11 is an analog input module from the SIMATIC S5 series, designed to handle floating signals with 8 isolated inputs. This module is essential for applications requiring precise analog signal processing in industrial automation systems. It is no longer in production and is available only as a spare part, ensuring continued support for existing systems. The module's compact dimensions and robust design make it suitable for various industrial environments. For users seeking to extend the module's lifespan, repair services are available, offering a cost-effective alternative to replacement. This approach helps maintain operational continuity and system reliability.
