Ask about this product

Manufacturer	Siemens
Catalog number	6es5470-8md12
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Product Type	Analog Output Module
Voltage Range	+1V to +5V
Number of Outputs	2
Compatibility	S5-90U, S5-95U, S5-100U, ET 100U, ET 200U
Module Series	SIMATIC S5

Description

The Siemens 6ES5470-8MD12 is an analog output module from the SIMATIC S5 series, designed for use with S5-90U, S5-95U, S5-100U, ET 100U, and ET 200U programmable logic controllers (PLCs). This module provides two floating analog outputs, each capable of delivering a voltage range from +1V to +5V, facilitating precise control in various industrial automation applications. It is engineered for seamless integration into the SIMATIC S5 system, ensuring reliable performance and ease of maintenance. The module's compact design allows for efficient use of panel space, making it suitable for installations where space is at a premium. Its robust construction ensures durability and longevity, even in demanding industrial environments. The 6ES5470-8MD12 is an essential component for applications requiring accurate analog signal output, such as process control systems, automated manufacturing processes, and other industrial automation tasks.
