| **Manufacturer** | Siemens |
| **Catalog number** | 6es5470-7la11 |
| **Category** | Industrial automation components |
| **Product type** | Industrial automation components |
| **Status** | Legacy / discontinued |

## Technical specification

| | |
|---|---|
| **Weight** | 0.34 kgs |
| **Product Type** | Module |
| **Signal Level** | 10 V |
| **Number of Outputs** | 8 channels |
| **Output Voltage** | ±10 V |
| **Output Current** | 0 to 20 mA |
| **Compatible PLCs** | Siemens S5-115U/F |
| **Design Type** | Block Design |
| **Discontinued Status** | Discontinued |

## Description

The Siemens 6ES5470-7LA11 is an analog output module from the SIMATIC S5 series, designed for precise industrial applications. This module features eight floating outputs capable of delivering both voltage (±10 V) and current (0 to 20 mA) signals, making it suitable for diverse control systems requiring stable and isolated outputs. The 6ES5470-7LA11 is compatible with Siemens S5-115U/F PLCs, ensuring seamless integration into existing automation setups. Its block design facilitates easy installation and maintenance within larger systems. Although officially discontinued, the 6ES5470-7LA11 remains relevant in many legacy systems due to its robust design and operational reliability. For those maintaining older systems, repair services are available to extend the module's usability beyond its original lifecycle.
