Manufacturer	Siemens
Catalog number	6es5340-3kb21
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.15 kgs
Product Type	Memory Module
Memory Capacity	32 kB Kilobytes
Series	SIMATIC S5
Repair Service Availability	Available
Discontinued Status	Discontinued

Description

The Siemens 6ES5340-3KB21 is a memory module from the SIMATIC S5 series, designed to provide reliable and efficient data storage solutions for industrial automation systems. This module offers 32 kilobytes of RAM, ensuring substantial memory capacity for various automation applications. As part of the SIMATIC S5 series, it is engineered to integrate seamlessly with Siemens PLC systems, enhancing their performance and data handling capabilities. Despite being discontinued, the 6ES5340-3KB21 remains a valuable component for existing systems, and repair services are available to extend its operational life.
