Manufacturer	Siemens
Catalog number	6es5340-5ab11
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	2.47 kgs
Memory Size	16K bytes
Product Type	Memory Module
Application Area	Industrial Automation
Discontinued Status	Discontinued
Repairability	Repairable

Description

The Siemens 6ES5340-5AB11 is a 340 memory module designed for the SIMATIC S5 series programmable logic controllers (PLCs). This module offers 16K bytes of RAM, providing essential memory storage for PLC systems. Originally available as a spare part, it has been discontinued and is no longer supported or produced by Siemens. Despite its discontinued status, the 6ES5340-5AB11 remains a critical component for legacy systems still in operation. Due to its robust design and historical significance, it continues to be repairable, allowing for extended usability without the need for significant system overhauls. Repair services are available through specialized providers, ensuring functionality and longevity for your equipment.
