Description

The Siemens 6ES5467-8EF11 is an analog input module from the SIMATIC S5 series, designed for the S5-100U PLC system. This module features two inputs for PT100 sensors, enabling precise temperature measurements in industrial applications. Manufactured by Siemens, a leader in industrial automation, the 6ES5467-8EF11 ensures reliable performance and durability. Despite being discontinued in 2010, it remains a valuable component for existing systems, offering repairability to extend its operational life. This module is ideal for applications requiring accurate temperature monitoring and control.
