Description

The Siemens 6ES5440-5AA11 is a digital output module from the SIMATIC S5 series, designed for industrial automation systems. This module features 32 non-isolated digital outputs, each capable of handling 24V DC at 0.12A, making it suitable for controlling various industrial devices. Its rugged construction ensures durability and reliable performance in demanding environments. The module has reached the end of its lifecycle as of July 10, 2005, but its repairability offers significant advantages. Opting for repairs can extend the product's usability without the need for immediate replacement. This makes the 6ES5440-5AA11 a valuable component for maintaining and upgrading legacy automation systems.
