|---|---|
| **Weight** | 0.03 kgs |
| **Voltage** | 110 - 220 V |
| **Current** | 2 - 8 A |
| **Measurement Range** | 110 - 220 |
| **Product Type** | Module |
| **Signal Level** | 220 V |

## Description

The Siemens 6ES5415-7AA11 is a digital output module from the SIMATIC S5 series, designed for industrial automation applications. This module provides eight digital outputs, each capable of handling 2 A at 110/220 VAC, facilitating reliable control of various industrial processes. It features galvanic isolation, ensuring protection against electrical surges and enhancing system stability. The module is housed in a compact form factor measuring 170 mm in length, 150 mm in width, and 40 mm in height, with a weight of 0.6 kg, making it suitable for integration into space-constrained environments. As part of the SIMATIC S5-115U/H/F series, the 6ES5415-7AA11 is engineered for high-performance operations, offering robust and dependable performance in demanding industrial settings. Please note that this module has been discontinued and is no longer supported by Siemens as of May 21, 2007. However, repair services are available to extend its operational life.
