Ask about this product

Manufacturer	Siemens
Catalog number	6es5470-8md11
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.91 kgs
Voltage	1 - 5 V
Measurement Range	1 - 5
Product Type	Module
Signal Level	5 V

Description

The Siemens 6ES5470-8MD11 is an analog output module designed for the SIMATIC S5 series, specifically compatible with S5-100U and ET 100U PLC systems. This module features two outputs with a voltage range of 1 to 5 volts, facilitating precise analog signal conversion for various industrial applications. It is available as a spare part, essential for maintaining legacy systems that rely on the robust and reliable S5-100U/ET 100U PLCs. The module's compact dimensions—135 mm in height, 100 mm in length, and 45 mm in width—ensure efficient integration into existing setups. With a weight of approximately 0.3 kg, it offers a lightweight solution without compromising on performance. As the 6ES5470-8MD11 has reached its end-of-life status, repair services are available to extend its usability, providing a cost-effective and sustainable option for users seeking to maintain their existing systems. For detailed specifications and repair services, refer to the authorized distributor's page.
