Description

The Siemens 6ES5552-3UA21 is a diagnostic processor module from the SIMATIC S5 series, specifically the CP 552 model. Designed for industrial automation applications, this module facilitates efficient data processing and system diagnostics. It features 768 kilobytes of memory, enabling robust performance in complex automation tasks. The module's compact dimensions of 29.9 cm x 23.3 cm x 6.6 cm and weight of 1.06 kg make it suitable for integration into various industrial environments. As a discontinued product, it remains valuable for maintaining and upgrading existing systems, offering reliable diagnostic capabilities for legacy automation setups.
