Manufacturer	Siemens
Catalog number	6es7486-3aa00-0ab0
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.23 kgs
Processor Type	Pentium 75 MHz
Interface Type	MPI
Module Positions	2
Dimensions	225 x 290 x 50 mm
Weight	1.42 kg

Description

The Siemens 6ES7486-3AA00-0AB0 is a central processing unit (CPU) module designed for the SIMATIC M7-400 series, offering robust performance for industrial automation applications. This CPU features a Pentium 75 MHz processor, ensuring efficient processing capabilities for complex control tasks. It includes an MPI (Multi-Point Interface) for seamless communication within automation systems. The module provides two interface module positions, allowing for flexible system expansion and integration. With a compact design measuring 225 mm in height, 290 mm in length, and 50 mm in width, it is suitable for various industrial environments. The unit weighs approximately 1.42 kg, facilitating easy installation and maintenance. Please note that this product has been discontinued by the manufacturer as of October 1, 2005. However, it remains repairable, offering a cost-effective solution for extending the lifecycle of existing systems. For detailed specifications and repair services, refer to the datasheet available at SPS-SERVICE.eu.
