| **Manufacturing Country** | Germany |
| **Lifecycle Status** | End of Life |

## Description

The Siemens 6DS1844-8FA is a high-performance memory module designed for the AS 235 automation system. It features 1 MB of system RAM and 4 MB of user RAM, ensuring efficient data processing and storage. The module includes an ECC real-time clock, enhancing data integrity and system reliability. A backup battery (W79084-U1001-B2) is available separately to maintain data during power outages. Manufactured in Germany, this module adheres to Siemens' stringent quality standards. Please note that as of December 31, 2020, the 6DS1844-8FA has reached the end of its lifecycle. However, it remains repairable, offering a cost-effective alternative to full replacement. Opting for repair services can significantly extend the module's operational life, providing both economic and environmental benefits.
