Manufacturer	Siemens
Catalog number	6dd1660-0aj1
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.39 kgs kg
Product Type	C61 Communications Module
Brand	Siemens
Series	Simadyn D
Product Family	SIMADYN D
Application Area	Industrial Automation Systems

Description

The Siemens 6DD1-660-0AJ1 is a C61 Communications Module designed for industrial automation systems, ensuring effective communication within automation networks. This module is part of Siemens' Simadyn D series, known for its reliability and performance in complex automation environments. It features a robust design suitable for various industrial applications, facilitating seamless data exchange and system integration. The module's specifications include a weight of approximately 0.3 kg, making it suitable for integration into existing automation setups without significant modifications. Its compact form factor allows for flexible installation options, catering to diverse industrial requirements. The 6DD1-660-0AJ1 module is engineered to meet the stringent demands of modern industrial automation systems, ensuring reliable and efficient data exchange. Its design and functionality make it a valuable component for enhancing communication capabilities in automation networks.
