Description

The Siemens 6ES5400-7AA12 is a digital input module designed for the SIMATIC S5-100 series PLCs. This module features eight digital inputs operating at 24V DC, facilitating the integration of various digital signals into automation systems. Its robust design ensures reliable performance in industrial environments, making it suitable for applications requiring precise control and monitoring. Despite being discontinued, the 6ES5400-7AA12 remains a valuable component for maintaining and upgrading existing SIMATIC S5-100 systems. Its repairable nature offers a cost-effective and sustainable solution for extending the operational life of automation equipment.
