Ask about this product

Manufacturer	Siemens
Catalog number	6av3673-1ca31
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.58 kgs
Signal Type	24
Signal Level	24 V
Product Type	Control Panel Interface Module
Number of Inputs	32
Number of Outputs	32
Supply Voltage	24 V DC
Protection Class	IP20
Enclosure Rating	NEMA 1
Weight	0.60 kg

Description

The Siemens 6AV3673-1CA31 is a Control Panel Interface (CPI 2) designed for seamless integration with Siemens OP27/37 and TP27-10/37 human-machine interfaces (HMIs). This module facilitates efficient communication between the operator panel and the automation system, ensuring reliable data exchange and control operations. Equipped with 32 inputs and 32 outputs, it supports a wide range of industrial applications, enabling precise monitoring and control of various processes. Operating at a supply voltage of 24V DC, the 6AV3673-1CA31 is suitable for environments requiring low-voltage operation. Its compact design and robust construction make it ideal for integration into control panels, contributing to streamlined system configurations and enhanced operational efficiency. This module is an essential component for applications where reliable and efficient control panel

interfacing is critical.
