Manufacturer	Siemens
Catalog number	6es5312-5aa21
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.28 kgs
Product Type	Interface Module
Product Family	SIMATIC S5
Application Area	Industrial Automation
Cable Length	0.42 meters m
Discontinued Date	October 1, 1999

Description

The Siemens 6ES5312-5AA21 is an interface module designed for the SIMATIC S5 series, specifically the 312 model. This module facilitates centralized configuration by connecting expansion units to a central controller or another expansion unit. It is the 'A' version, intended for use with an expansion unit located below, and supports a cable length of up to 0.42 meters. This design enhances the flexibility and scalability of automation systems, making it suitable for complex production environments. Despite being discontinued as of October 1, 1999, the 6ES5312-5AA21 remains a reliable component in legacy systems. Its robust construction ensures long-lasting performance, and it continues to be repairable, offering a cost-effective solution for extending the operational life of existing setups.
