Description

The Siemens 6ES5400-7AA11 is a Digital Input Module from the SIMATIC S5 series, designed for industrial automation applications. This module features 8 digital inputs, each capable of handling 24 V DC signals, facilitating the integration of various digital devices into automation systems. With compact dimensions of 35 x 250 x 160 mm and a weight of 300 grams, it is suitable for installations where space and weight considerations are critical. The module operates reliably within the SIMATIC S5-100 400-7 system, ensuring seamless communication and control within the automation setup. Its robust design and compatibility with the SIMATIC S5 series make it a valuable component for enhancing the functionality and efficiency of industrial automation processes.
