Description

The Siemens 6DS1605-8BA is a binary output module designed for the TELEPERM M series, featuring 16 relay outputs suitable for various industrial automation applications. Operating with a supply voltage of +24 V (20–33 V), it offers reliable performance in demanding environments. The module's dimensions are 233.4 x 160 mm for the PCB, with a front panel width of 30.48 mm, facilitating integration into standard control panels. This module is ideal for applications requiring multiple relay outputs, such as controlling actuators, alarms, or other devices in industrial settings.
