Manufacturer	Siemens
Catalog number	6es5244-3aa21
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.37 kgs
Product Type	Temperature Control Module
Product Family	SIMATIC S5
Dimensions	27 cm x 8 cm x 40 cm
Weight	0.36 kg
Discontinued	Yes

Description

The Siemens 6ES5244-3AA21 is a temperature control module from the SIMATIC S5 series, specifically designed for precise temperature regulation in industrial automation systems. This module, also known as the IP244B Temperature Control Module, features self-tuning capabilities and analog inputs, ensuring high accuracy and reliability. It offers a high degree of interference suppression, making it suitable for environments with significant electrical noise. Despite being discontinued and no longer receiving official lifecycle support since April 1, 2004, the 6ES5244-3AA21 remains a valuable component for existing systems. Its repairable design allows for continued use, providing cost-effective solutions for maintaining legacy equipment. The module's dimensions are 27 cm in length, 8 cm in height, and 40 cm in depth, with a weight of approximately 0.36 kg. For those seeking to extend the life of their existing systems, professional repair services are available, offering comprehensive overhauls and preventive maintenance to ensure ongoing functionality.
