Ordering Information

The catalog numbers listed here are for complete, non-interchangeable trip circuit breakers without lugs.

For factory installed nut keepers (3VA94730QA00), change the 12th digit of the catalog number to "2" (required to install a breaker in a panelboard or switchboard that has a provision). (For example, a 35KA @480VAC, 400A, 3-pole, 3VA63 with nut keepers would be catalog number 3VA6340-5HL3**2**-0AA0).

For factory installed standard line and load lugs, change the 12th digit to "6" (standard lugs are identified in the lug table and footnotes in this section of the SpeedFax). (For example, a 35KA @480VAC, 400A, 3-pole, 3VA63 with lugs would be catalog number 3VA6340-5HL3**6**-0AA0). Alternate connectors can be ordered separately for field installation.

3VA63 electronic trip circuit breakers are available with 100% ratings (up to 250A only in this frame – 400A with 100% ratings can be purchased in the 600A frame). For 100% rated electronic trip circuit breakers, change the 13th digit of the catalog number to the number "2". (For example, a 35KA @480VAC, 400A, 3-pole, 100% rated 3VA63 would be catalog number 3VA6340-5HL31-**2**AA0). Requires the use of rated lugs — see lug table below.

Parameter input via display unit

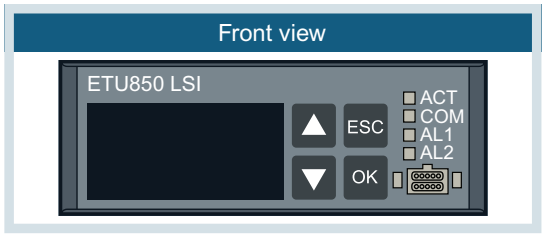

Parameters are set via the display unit and its buttons. This functionality is available, however, only if a separate, dedicated power supply is connected to the molded case circuit breaker or if a current flow is more than 20% of L_n in one of the 3 phases. Alternatively, temporary power can be supplied with one of the available test devices: TD300 (3VA9977-0MA10) or TD500 (3VA9977-0MB10) in order to make adjustments before the equipment is fully installed and powered up.
