Ask about this product

Manufacturer	Siemens
Catalog number	6es5405-7aa21
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	0.20 kgs
Product Type	Digital Input Module
Number of Inputs	8 inputs
Input Voltage	220 V AC
Galvanic Isolation	Yes
Brand	Siemens

Description

The Siemens 6ES5405-7AA21 is a digital input module from the SIMATIC S5 series, designed for industrial automation applications. This module features eight galvanically isolated inputs, each rated for 220 V AC, enabling it to interface with high-voltage digital signals while protecting the rest of the system from electrical surges. Its compact design ensures efficient integration into existing SIMATIC S5 systems, facilitating seamless upgrades and expansions. The 6ES5405-7AA21 is ideal for applications requiring reliable digital signal processing in environments with high electrical noise, such as manufacturing plants and process control systems. Its robust construction and high-quality components ensure long-term durability and consistent performance, making it a valuable component for maintaining and enhancing industrial automation systems.
