Manufacturer	Siemens
Catalog number	6es5246-4ua21
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Product Type	Positioning Module
Series	SIMATIC S5
Application Area	DC Drives and Incremental Position Encoders
Ventilation	Self-Ventilated
Product Type	Positioning Module
Series	SIMATIC S5
Application Area	DC Drives and Incremental Position Encoders
Ventilation	Self-Ventilated
Discontinued	Yes

Description

The Siemens 6ES5246-4UA21 is a self-ventilated positioning module from the SIMATIC S5 series, designed for precise control of DC drives and compatible with incremental position encoders. This module is integral to automation systems requiring accurate positioning and reliable performance. Despite its discontinuation, the 6ES5246-4UA21 remains a valuable component for legacy systems, offering repairability to extend operational life. Its robust design ensures consistent functionality in demanding industrial environments.
