Description

The Siemens 6ES5946-3UA21 is a central processing unit (CPU) module designed for the SIMATIC S5-155U programmable logic controller (PLC). Manufactured by Siemens, this CPU module is integral to the S5-155U PLC system, providing essential processing capabilities for industrial automation tasks. The 6ES5946-3UA21 is part of the SIMATIC S5 series, known for its reliability and performance in industrial environments. This CPU module is discontinued and is available only as a spare part. Despite its discontinued status, it remains a viable option for maintaining existing automation systems that have not transitioned to newer technologies. Repairing this unit can extend its usability, offering a cost-effective solution to keep older systems operational.
