Manufacturer	Siemens
Catalog number	6av3515-1eb00
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.69 kgs
Voltage	2 V
Interface Type	rs422
Component Specifications	rs422
Signal Type	24
Signal Level	24 V

Description

The Siemens 6AV3515-1EB00 is a robust Operator Panel from the OP 15/A series, designed to provide efficient human-machine interface solutions in industrial settings. This panel features a two-line display, each capable of showing 40 characters, ensuring clear and comprehensive data visualization. It operates at a supply voltage of 24 V DC and utilizes an RS422 interface for reliable communication. The panel's dimensions are 240 mm in length, 170 mm in height, and 50 mm in depth, with a weight of 1.12 kg, making it suitable for various industrial applications where space and durability are considerations. Please note that this model has been discontinued since December 1, 2004, and is no longer under active support. However, its durability and functionality have made it a go-to choice for many users in its active years. For those seeking to extend the operational life of existing units, repair services are available to maintain their functionality.
