Ask about this product

Manufacturer	Siemens
Catalog number	6ds1603-8rr
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.20 kgs
Product Type	Digital Output Module
Number of Outputs	32 outputs
Output Current per Channel	400 mA
Total Output Current	4000 mA
Module Type	Non-Isolated

Description

The Siemens 6DS1603-8RR is a digital output module designed for advanced control systems, offering 32 outputs with a maximum current of 400 mA each, totaling 4000 mA. Manufactured in Germany, this module is part of the Teleperm M\/ME series, reflecting Siemens' commitment to high-quality industrial automation components. It is a non-isolated module, eliminating the need for external isolation components and enhancing operational efficiency. The 6DS1603-8RR has been discontinued, with its lifecycle ending on December 31, 2020. Despite its discontinuation, the module remains repairable, providing a cost-effective solution for extending the lifespan of existing systems. For maintenance and repair services, specialized providers offer support to ensure continued functionality of the module in industrial applications.
