Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.72 kgs
Voltage	DC
Current	7 A
Relay Specifications	7 A
Product Type	Module
Signal Type	24
Signal Level	24 V

Description

The Siemens 6ES5951-7ND21 is a power supply unit designed for the SIMATIC S5-115F PLC system. It provides a 24V DC input and delivers a 5V DC output at 7A, ensuring stable and reliable operation for your PLC applications. This model operates without a backup battery, simplifying maintenance and enhancing system reliability. As a discontinued product, it is no longer supported or manufactured, but existing units can benefit from professional repair services to extend their usability. Opting for repair services can restore functionality and provide a cost-effective alternative to replacement, preserving existing infrastructure and minimizing downtime.
