Technical specification

Weight	0.41 kgs
Weight	0.78 kg
Dimensions	200 mm x 250 mm x 40 mm
Display Type	Color
Memory Slots	3
Serial Interfaces	2

Description

The Siemens 6FM1470-3BA21 is a high-quality display module designed for efficient communication and operational control within industrial environments. This Human-Machine Interface (HMI) unit features a vibrant WF 470B color display, providing clear visibility and ease of use. It includes three slots for memory modules and a second serial interface, ensuring extensive functionality and connectivity. The module supports multiple languages, including German, English, French, and Russian, making it versatile for international applications. Despite its discontinuation, its robust design and versatility make it a valuable component for existing systems, especially those reliant on legacy technologies. Given that the 6FM1470-3BA21 is repairable, choosing to repair rather than replace this module can significantly extend its operational life. Specialized repair services are available to maintain the functionality of this discontinued model, offering a cost-effective and sustainable solution for businesses looking to maximize their investments in existing hardware.
