Description

The Siemens 6ES5-470-7LC11 is an analog output module designed for the SIMATIC S5 series PLCs, specifically compatible with S5-115U/H/F models. This module provides eight floating analog outputs, each capable of delivering signals in the range of 1 to 5 volts or 4 to 20 milliamps, ensuring precise and reliable performance for various industrial automation applications. Its design facilitates seamless integration within existing systems, offering a cost-effective solution for maintaining and extending the operational life of legacy automation equipment. As a discontinued product, the 6ES5-470-7LC11 remains a valuable component for users seeking to repair or upgrade their existing Siemens S5 PLC systems.
