Ask about this product

Manufacturer	Siemens
Catalog number	6es5482-8ma11
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.13 kgs
Product Type	Module
Signal Level	24 V
Current	0.1 A
Signal Type	24

Description

The Siemens 6ES5482-8MA11 is a Digital Input/Output (I/O) module from the SIMATIC S5 series, designed for integration with S5-100U PLC systems. This module features 16 digital inputs and 16 digital outputs, operating at a supply voltage of 24 V DC. The outputs are divided into two groups: one group of 8 outputs with a current capacity of 0.1 A, and another group of 8 outputs capable of handling 0.5 A. This configuration allows for flexible control of various industrial processes, accommodating both low and higher current requirements. The module is housed in a compact form factor, facilitating easy integration into existing control systems. Its robust design ensures reliable performance in demanding industrial environments, making it a suitable choice for applications requiring precise digital I/O operations. For detailed specifications and integration guidelines, refer to the manufacturer's datasheet.
