Manufacturer	Siemens
Catalog number	6sl3200-0sp01-0aa0
Category	Industrial automation components
Product type	Industrial automation components
Status	Active product

Technical specification

Weight	1.63 kgs
Product Type	Spare Part
Dimensions	220 mm x 340 mm x 550 mm
Weight	3.60 kg
Manufacturer	Siemens
Series	SINAMICS

Description

The Siemens 6SL3200-0SP01-0AA0 is a spare part designed for the SINAMICS PM240 FSGX power module, a component of Siemens' SINAMICS series of variable frequency drives. This spare part includes the CIM PM-IF interface, a power supply board, and a complete mounting kit, ensuring seamless integration and reliable performance within industrial automation systems. The CIM PM-IF interface facilitates communication between the power module and other system components, while the power supply board provides the necessary electrical power for operation. The mounting kit includes all necessary hardware for straightforward installation, minimizing downtime during maintenance or replacement. This spare part is engineered for durability and consistent performance, supporting uninterrupted operations in demanding production environments. Its robust construction and compatibility with Siemens technologies make it a dependable choice for project managers and production leaders seeking reliable components for their automation systems.
