Technical specification

Weight	0.30 kgs
Product Type	Interface Module
Product Family	SIMATIC S5
Cable Length	0.3 m meters
Discontinued Date	2005-10-07
Repairable	Yes

Description

The Siemens 6ES5312-5AA13 is a SIMATIC S5 series interface module designed for the centralized connection of expansion units to a central controller or other expansion units. This module features a 0.3-meter cable, facilitating connections where the expansion unit is located above the central controller. It operates within the PLC category, ensuring seamless interoperability and communication between different units in an automated system, making it well-suited for reliable, industrial applications. Please note that this product has been discontinued and reached the end of its lifecycle on October 7, 2005. However, it remains repairable, offering a cost-effective solution for extending the usability of existing systems. Repairing this module can significantly enhance system stability and performance, even if it is not future-proof. Repairing rather than replacing can be a cost-effective solution, minimizing downtime and maintaining industry standards.
