Manufacturer	Siemens
Catalog number	6ds1312-8ab
Category	Industrial automation components
Product type	Industrial automation components
Status	Legacy / discontinued

Technical specification

Weight	0.15 kgs
Manufacturer	Siemens
Product Type	Interface Module
Product Family	TELEPERM
Discontinued	Yes
Repairable	Yes

Description

The Siemens 6DS1312-8AB is an interface module designed for seamless integration into industrial automation systems, facilitating efficient communication between control modules. Manufactured by Siemens, a leader in industrial automation, this module is part of the TELEPERM series, known for its reliability and performance. The 6DS1312-8AB is engineered to support one I/O bus, ensuring stable data exchange within automation setups. Despite being discontinued and reaching its end of lifecycle on December 31, 2020, the module remains a robust component within its category. Its repairability offers a cost-effective solution for extending the usability of existing systems. The module's compact design and high-quality manufacturing standards make it a valuable asset for maintaining operational efficiency in industrial environments.
