Description

The Siemens 6ES7222-1BF20-0XA0 is a digital output module from the SIMATIC S7-200 series, designed for integration with S7-22X CPUs. This module features 8 digital outputs operating at 24 V DC, each capable of handling up to 0.5 A, making it suitable for various automation applications requiring reliable digital signal output. The module's compact dimensions (45 x 80 x 62 mm) and lightweight design (approximately 150 g) facilitate easy integration into existing systems. As part of the SIMATIC S7-200 range, it offers compatibility and ease of use for users familiar with Siemens' automation products. Please note that this module has been discontinued as of May 1, 2001, but remains a viable option for existing systems through repair services.
