Description

The Siemens 6SN11131AA001KC1 is a Voltage Protection Module (VPM 200) designed to safeguard synchronous motors in industrial automation systems. This module is rated for 200 A and features dynamic metric cable glands, ensuring secure and reliable connections. It is specifically engineered for use with third-party synchronous motors, providing enhanced protection and compatibility in diverse applications. The VPM 200 is part of Siemens' SIMODRIVE series, known for their robust performance and integration capabilities in complex automation environments.
